**Progress Report of the Non Chemical Water Conditioner
MAGCAT+ 40mm (1.5") diameter & MAGCAT+ 25mm
(1") installed at School Premises and MAGCAT+ 25mm
(1") at the residence of owner of the school in the school
campus:**

Products installed:

Device-1: MAGCAT+ 40mm (1.5") Nos.- 01.,

Date of installation: 10.06.2016

Water Flow:12,800 LPH.

Device-2: MAGCAT+ 25mm (1") Nos.- 01No.,

Date of installation: 05.11.2016

Water Flow: 4,000 LPH.

Device-3: MAGCAT+ 25mm (1") Nos.- 01No.,

Date of installation: 16.01.2017

Water Flow: 4,000 LPH.

Installed & Service Provided by:

SKYMECH Engineers Private Limited, Jaipur (Raj.)

Dear all concerned,

We were facing problem of water scaling in the fittings (Taps & Showers in the hostels and academic compound) and choking in water supply pipe lines and solar water heaters in the school campus.

We came into touch with SKYMECH Engineers during the visit of their representative took place in the month of April; 2016 to our campus.

innovating minds...elevating souls

(A Division of Globe Trotters Educational Innovations (P) Ltd)

We discussed our problem with their representative who visited our premises and saw the problem of scaling and pipe lines choking with his own eyes.

The representative was quite confident to solve the problem and finally deal was concluded in June; 2016 and he offered to install the NCWC MAGCAT+ 40mm (1.5") diameter device at our campus.

After installation of the device in June; 2016 existing scale started to release and within 7-10 days we have to open our 2" diameter pipe rings to clean the lines. Scale in crystal form came out from the pipe lines and lot of existing lime scale released from the pipe rings and pipe lines and all felt happy to see this event happening.

Earlier to this installation we were using Magnetic devices and also taking help of chemical cleaning.

On getting the outstanding results from the installed device we ordered for two MAGCAT+ 25mm (1") devices one in our new school building installed in November; 2016 and one at the residence of our owner of the school installed in January; 2017.

To sum up we are happy with the results at all the places Bathrooms, Kitchens, Quarters of our campus with no scaling problem and also our old existing scale in all our water supply lines and fittings has been removed and now our all water supply lines and fittings are clear like new one.

We are happy and thankful to SKYMECH Engineers for providing us the solution of our scaling problem and recommend this marvellous product to solve the problem of water scaling and hardness for better and outstanding results which we could not get from our earlier treatments we applied and tried to get the results.

Thanks and Regards,
